with any ODBC Compliant Database

**Wall Display PLUS can maximize call center communication using centralized key data elements.** Gives users the ability to display a variety of data onto high-resolution displays, such as Plasma/LCD, projection screens and LED boards.

Additional data types include: ticker-tape text, threshold alert ticker, data messages, tables and customized charts and graphs.

RSS Feeds ensure the latest data from virtually any Internet source. Wall Display PLUS can accept XML RSS feeds from websites, featuring anything from stock quotes and news to time and weather. The possibilities are vast!

Schedule a **FREE DEMO** to see why so many call center managers have chosen Wall Display PLUS to optimize their call center communications.
